### Dear Kavita,

The idea has many aspects associated with it like what does the term "DIGITAL" mean and perhaps it is used to describe many things and some are very innovative, very useful, and some are even scary (like security or privacy breaches). Individuals and organizations are on a journey to digital transformation to various degrees and different stages. It is changing all aspects of our life...education, travel, shopping, entertainment, work, exercise, health, internet of things, minibots, industrial internet of things...you name it...

So where are we on this Digital Wave?  
What are the 5 big important things for you?  
How do we keep pace with this?

Join us for a lively discussion and debate...over drinks and dinner.
